Heizer Defense introduces the “Pocket AR” Pistol in .223 at NRA Show

Pevely Missouri 04/21/2014

Heizer Defense the designer of the PS1 “Pocket Shotgun” Pistol has done it again.

Heizer is proud to introduce the PAR1 Pocket AR Pistol in .223 and will be showing the product to NRA members in Indianapolis.

Gary Ramey, GM/COO of Heizer Defense noted “The PAR1 Pocket AR Pistol has had an unbelievable response from the industry. The PAR1 will be a small iPhone-sized pistol chambered in .223 and use the same reliable stainless steel frame as the PS1 Pocket Shotgun Pistol. We use only certified American stainless steel with a radiussed grip that is ergonomically designed. That is a key reason our pistols are comfortable to shoot and can handle the .223 cartridge. The PAR1 is just one more step in our product extensions and planned new product launches for this year. We’ll be adding more calibers and other new firearms shortly”.

Tom Heizer, Principal of Heizer Defense commented “The PS1 has been well-received and we have a strong response for PAR1 as well. We are adding capacity to keep up with consumer demand and will launch this pistol in July. We already have orders for the PAR1 and expect a great rollout. We’ll be showing both the PAR1 Pocket AR Pistol and the PS1 Pocket Shotgun Pistol at the NRA Show in Indianapolis. We invite all attendees to stop by Booth #6274 to see the pistols”.

For more information on the Heizer Defense products, visit www.heizerdefense.com

Heizer Defense is a state-of-the-art, high technology Firearm Company based in Pevely, Missouri.

Heizer Defense is an affiliated company of Heizer Aerospace. Founded in 1962, they manufacture fracture critical components for aerospace companies, NASA and the military.

Heizer Defense Engineers apply the same military technology to create high quality firearms.

Heizer Defense was founded by Charlie Heizer who escaped from war-torn Hungary over 50 years ago.

He has dedicated his life to engineering solutions that support American values and freedom.
